

Introducing the 3M Cubitron Product Range

Save time, money and ensure quality throughout your projects with the 3M Cubitron product range.

The [3M Abrasives range](#) of products offered by [SNAPCO Industrial & Packaging Supplies](#) Glasgow is one of the best on the market. SNAPCO is an official supplier of 3M, a company with an established reputation worldwide and solid experience in the abrasive finishing market, that is continuously developing new products and innovations.

The 3M industrial abrasive work on metal, timber, composite and other materials, with the new 3M Cubitron range specifically designed to blend and grind metal and stainless steel in a new, more effective way. The 3M Cubitron products cut faster, last longer and generate less heat than previous abrasive products on the market. This is a result of the mineral construction process involved in their manufacturing.

The [3M Industrial Abrasives](#) offered by SNAPCO include 3M™ Cutting / Slitting Discs, 3M™ Grinding Discs, 3M™ Sanding Solutions, 3M™ Flap Wheels, 3M™ Scotchbrite, 3M™ Belts and Rolls, 3M™ Cubitron II, 3M™ Air Tools, 3M™ Roloc Discs, 3M™ Roloc accessories and 3M™ Machine Deals. These come in different sizes, with different specifications and are suitable for a wide range of applications.

The 3M Cubitron range includes the 3M™ Cubitron II 982C Fibre Discs, 3M™ Cubitron II 775L Film Backed Hookit Discs, 3M™ Cubitron II Backing Pad and 3M™ Cubitron II 982C Fibre Discs (115mm) with more 3M Abrasive Discs and other products on the way.

3M™ Cubitron II 982C Fibre Discs (25 Pack)

The [3M™ Cubitron™ II 982C Fibre Disc](#) is ideal for edge chamfering, removal of carbon steel welds and bevelling. The engineers in 3M have developed the 3M Ceramic Abrasive Grains and the 3M Precision Shape Grain technology, which increase the cutting potential of the discs and lengthen the product life. In the centre of the

technology is the innovative design of the grains that are electrostatically oriented, forming sharp peaks and continuously self-sharpening, when they reach their point of break off. As a result, the discs cut through the metal, rather than grind it, reducing the friction and in turn generating less heat and granting a longer fiber disc life.

Ideal for grinding, weld removal and blending the 3M™ Cubitron™ II 982C Fibre Disc reduces the fatigue of the operator, maximises the productivity and outlasts all other conventional ceramic discs on the market.

3M™ Cubitron II 775L Film Backed Hookit Disc

The [3M™ Cubitron™ II 775L Film Backed Hookit Disc](#) also features the 3M Precision Shaped Ceramic Grain technology developed by 3M. Compared to conventional abrasives the discs using this technology can cut up to two times faster and can last up to six times longer. For any professional this means less working hours and increased efficiency. The 3M™ Cubitron™ II 775L Film Backed Hookit Disc come in packages of 250 and a range of sizes available, to suit your individual needs.

3M™ Cubitron II Backing Pad

The [3M Cubitron II Backing Pad](#) supplied by SNAPCO has a unique optimised rib pattern and high temperature resistance of over 100 degrees centigrade. The backing pad is specifically designed to work in conjunction with the 3M Cubitron II discs. Its main purpose is to improve the disc life and to increase the cut rate. As a result the use of the 3M Cubitron II Backing pad can lower you cost and increase your productivity which makes it a great solution for the needs of any professional.

3M™ Cubitron II 982C Fibre Discs (115mm) – 25 Pack

The [3M™ Cubitron™ II 982C Fibre Disc](#) is ideal for bevelling, edge chamfering and removal of carbon steel welds, pits, mill scale, machine grooves and imperfections. Featuring the 3M™ Ceramic Abrasive Grain and 3M Precision Shaped Grain technology these fiber discs last longer and work faster. The vulcanised fiber used in their stiff backing resists wear and is suitable for grinding and metal stock removal.

Buy 3M Cubitron products from SNAPCO Glasgow

If you are looking for 3M Abrasive Products and you think that the 3M Cubitron range is suitable for your needs then [SNAPCO Glasgow](#) is the supplier for you. We work closely with all our partners on providing the latest innovations in abrasives to all our customers, with fast deliveries to UK mainland. If you have any questions regarding our products do not hesitate to [contact us](#) and our professional team will assist you.
